SEEDS • BULBS • PLANTS

To professional horticulturists and garden enthusiasts we present our Autumn 1940 Catalog.

We hope browsing through its pages will afford helpful suggestions and enable you to capture the enduring beauty in gardens that turn out as you desire them.

Surely few creative activities at like expenditure afford such fascinating diversion, physical well-being and mental relaxation.

Identical quality is the only true basis of price comparison. In planning your budget keep in mind no initial saving can compensate for the ultimate disappointment that follows the use of inferior stock.

SUPERINTENDENTS AND GARDENERS

We maintain contact with available estate superintendents, farm managers, gardeners, and greenhouse assistants. We recommend only those we know to be competent men and whose references bear thorough investigation. The facilities of this service are extended to employer and employee—without charge.

Andrew R. Kennedy, Inc., give no warranty, express or implied, as to description, quality, productiveness or any other matter of any seeds, bulbs or plants they send out, and they will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are at once to be returned. All claims must be made within five days after receipt of goods.

TERMS: Net cash; 6% interest after sixty days.

Owing to the unusual conditions, prices are subject to change.

Giant Winter-Flowering Pansy

KENNEDY'S SUPERIOR STRAIN

Many years have been spent in the development of this strain of Pansy for forcing. Last year we distributed a limited number of packets for trial to customers in various sections of the country and all advised that "*Kennedy's Superior Strain*" of Winter Flowering Pansy is *superior* to any they have ever grown or seen.

The photograph on this page was taken in late March from seed sown the previous July. These plants have been in flower since Thanksgiving, are now 4 feet in height and have produced an abundance of giant Pansies 3 to 4 inches in diameter with 10- to 12-inch strong stems, in a full range of colors.

When transplanting seedlings from seed bed they should be set 6 inches apart, being very careful to plant them the same depth as they were in the seedling bed.

The final transplanting may be one plant in a 7- or 8-inch pot or in boxes 12 inches deep by 12 inches wide, plants spaced 8 inches apart, or in greenhouse bench. Greenhouse night temperature should be 45 degrees to 50 degrees. Packet, \$3.00.

For outdoor Pansy seed, see page 60.

Kennedy Kwality Prepared

Our specially prepared bulbs for early flowering again this past winter proved superior in earliness, size and number of flowers.

To shorten the growing period of different types of forcing bulbs we have perfected the process in curing and precooling which makes their forcing earlier and one hundred per cent productive.

As a result of this special preparation all our prepared bulbs bloom from twenty-one to sixty days earlier than the same varieties taken from regular stock.

We wish to call your attention to our list of greenhouse grown Freesia bulbs. All the varieties in this box are greenhouse grown, in sterilized soil. POETAZ VARIETIES

The demand for these satisfactory hybrids of Ornatus X Polyanthus is again increasing steadily, as before the quarantine. Deservingly so, for there is no better group of Narcissus for indoor culture in pots and in bowls, while their hardiness outdoors, often questioned, leaves nothing to be desired if planted on time.

Aspasia. Superior to Elvira, more florets per stem and perianth purer white, also larger. For forcing, Aspasia is greatly to be preferred. Large white perianth with yellow crown. Doz., \$2.10; 100, \$15.00.

CHEERFULNESS. Double white Poetaz hybrid, 3 to 4 large flowers on a strong stem. While the general effect of the coloring is white, there is a suggestion of pale yellow at the base of the petals which gives character to the entire flower. Stands out as one of the best and most charming introductions. Proven hardy in New England. Doz., \$2.10; 100, \$15.00.

EARLY PERFECTION. The earliest of all Poetaz. A great improvement over Elvira, 6 to 8 flowers per stem, white with yellow cup. Can be forced to bloom in early January. Doz., \$2.10; 100, \$15.00.

GERANIUM. Large pure white perianth with a magnificent orange-red cup. Four to six flowers on a stem. Truly an exhibition variety. Doz., \$11.00; 100, \$75.00.

GLORIOUS. Perfectly round flat perianth, of purest white; brilliant orange cup. Recommended highly for exhibition. Doz., \$8.50; 100, \$60.00.

Laurens Koster. Pure white perianth, orange cup. Forces early. Doz., \$1.45; 100, \$10.00.

LA FIANCEE. The best white Poetaz. Broad pure white perianth of heavy texture, large deep orange-red eye. Very early and free blooming. Doz., \$2.65; 100, \$18.00.

ORANGE CUP. Creamy white, conspicuous orange cups, a most delightful color combination. Doz., \$2.10; 100, \$15.00.

SCARLET GEM. Four to five flowers to the stem. Deep golden yellow perianth with solid deep red cup. Doz., \$3.50; 100, \$25.00.

DOUBLE VARIETIES

ALBUS PLENUS ODORATUS. Double, large, pure white. Its fragrance adds to its general usefulness as a cut flower. Highly recommended. Doz., \$1.60; 100, \$12.00.

MARY COPELAND. Beautifully formed double rows of pure white petals interwoven with shorter deep orange-red segments. Doz., \$8.00; 100, \$60.00.

ORANGE PHOENIX. Double flowers made up of rows of snow-white petals which seem to be held in place by lacy ribbons of yellow and bright orange. Doz., \$2.10; 100, \$15.00.

PRIMROSE PHOENIX. Primrose-yellow, large rose-shaped flower, long stems. A more satisfactory double form than Von Sion. Doz., \$2.10; 100, \$15.00.

SNOWSPRITE. Double Leedsii pure white with just a suggestion of clearest pale yellow, very late. Doz., \$2.65; 100, \$18.00.

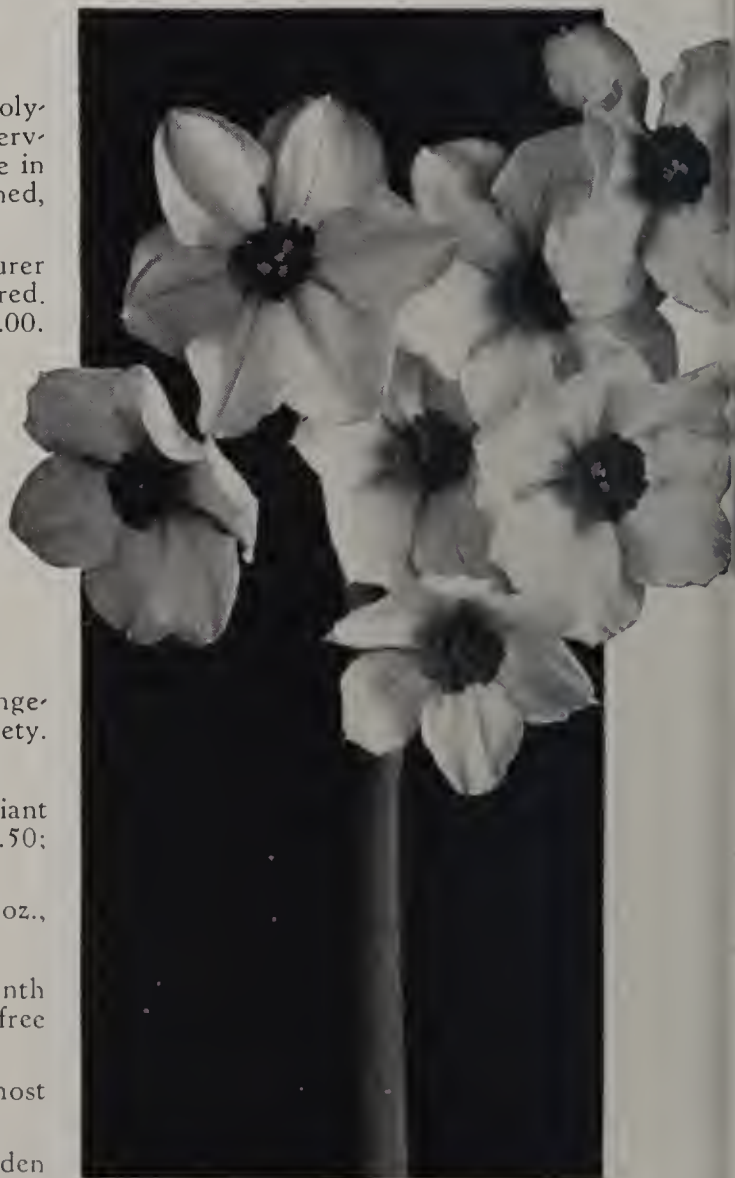

THE PEARL. Very dwarf. Silvery perianth, neatly formed center of prettily curved wavy petals of campernel color. Doz., \$2.10; 100, \$15.00.

TWINK. Double of the semi-full type, the petals alternating a soft primrose and clear orange, give the flower a most attractive appearance and make it most adaptable for decorative work. Forces easily, also flowers very early in the field. Doz., \$2.90; 100, \$20.00.

VON SION. The real old-fashioned double Daffodil. Large double flower of golden yellow.

Extra Selected Double Nose Bulbs. Doz., \$1.60; 100, \$12.00.

Mother Bulbs. Doz., \$2.10; 100, \$15.00.

RECURVUS (Pheasant's Eye). Pure white perianth, cup deep orange-red. **Mother Bulbs.** Doz., \$1.15; 100, \$8.00; 1,000, \$75.00.

JONQUILS and CAMPERNELLES

Kennedy Kwality Hardy Lilies—continued

The Lilies we offer are all perfectly hardy and will produce a quantity of beautiful flowers of various colors, which effect cannot be duplicated by any other flower. Lilies are very adaptable for herbaceous borders or for planting among shrubbery. Bulbs should be planted at least twice their own depth and if the soil is heavy it is desirable to use a quantity of sand under the bulbs to provide drainage.

Explanation: The numerals refer to the season of bloom, thus 6 would mean June; 7, July; 8, August.

AURATUM (Golden Rayed Lily of Japan). White, studded with crimson spots, and through the center of each petal is a gold band; large and fragrant. (8).
Mammoth Bulbs. Doz., \$7.50; 100, \$50.00.
Monster Bulbs. Doz., \$8.50; 100, \$60.00.

AURATUM. (Wild or Collected.) Collected from the mountains of Japan. Absolutely hardy, free from disease and includes many varieties of the Auratum family. We cannot recommend these Collected Auratum too highly for permanent outdoor planting.

AURATUM PLATYPHYLLUM. Enormous white flower beautifully spotted with yellow.
Mammoth Bulbs. Doz., \$6.50; 100, \$50.00.

Its giant white spikes with contrasting golden yellow stamens are among the earliest to appear in summer and most beautiful of all June-flowering Lilies. Its flower stems reach a height of 4 feet and the blooms make a charming contrast with Delphiniums in the hardy flower border. Our Northern French grown bulbs reach us in August-September and **must** be planted during the fall.

GIANT FLOWERING DARWIN TULIPS

The Darwin Tulip is of the later-flowering class. For beds and borders we recommend the following varieties for their stately bearing and rich colors. These Tulips grow from 24 to 34 inches high, the flowers are borne on strong stems and are of the finest shades known among flowers.

They excel all other Tulips in color, ranging from softest pink to deep red, blue, mauve, and lavender to black, white and yellow.

Great care has been exercised to select only the best varieties in each color class. However, we are in a position, through our growers in Holland, to supply any variety requested if ordered before August 15th. Varieties prefaced by an F are most suitable for forcing; varieties prefaced by an F and O are equally suitable for indoor or outdoor culture; varieties prefaced by an O are for outdoor culture only. Those varieties are of exceptional merit and bear highest recommendation.

Kennedy Kwality Lawn Grass Seed

For Permanent Lawns of Putting Green Texture

HOW TO MAKE A LAWN

The ground should be thoroughly prepared; that is, the soil should be fertilized, then turned over to a depth of six inches and pulverized. Sow good seed (which is very essential) roll the ground and cross roll in order to press the seed firmly into the soil. The proper time to sow grass seed depends upon the latitude. In the central and eastern states seed may be sown from March 1st to the end of June. Seed may be sown in the fall, from the first part of August to the end of October. Sow, if possible, when the ground is moist. For seeding a new lawn use 5 to 6 bushels to the acre.

KENNEDY'S BENTURF

Reg. U. S. Pat. Off.

Lawn Grass Seed Mixture (Bent Formula)

The popularity of golf in recent years has made comparison of lawns and putting greens an easy matter. One hardly expects his lawn to look as perfect as a putting green, but this is possible if sown with Kennedy's Benturf Lawn Grass Seed Mixture. With reasonable preparation and care excellent results have been accomplished with our Kennedy's Benturf Lawn Grass Seed Mixture which contains a large amount of Bent seed. This makes a compact, rapid growth, forming a close sward withstanding wear and tear. Lb., \$1.50; 5 lbs., \$7.00; 25 lbs., \$32.50; 100 lbs., \$125.00.

KENNEDY'S GREENTURF

Lawn Grass Seed Mixture (Formerly Kennedy's Green Velvet)

This is the lawn grass seed mixture which for over 25 years has seeded many of the most beautiful lawns in America under the name of Kennedy's Green Velvet Lawn Grass Seed Mixture. Recently worthless mixtures bearing the trade name "Green Velvet" have been marketed to the confusion of our patrons. To avoid this confusion we have changed the name to KENNEDY'S GREENTURF LAWN GRASS SEED MIXTURE. The seed in this mixture is all recleaned and especially adapted to withstand the heat and drought of the summer. When properly sown and cared for GREENTURF will produce a beautiful green lawn the entire season. Lb., 80c; 5 lbs., \$3.75; bu., \$14.50; 100 lbs., \$70.00.

KENNEDY'S KARPETURF

Lawn Grass Seed Mixture

This mixture is comprised of some of the quick germinating grasses as well as larger proportions of the permanent, deep rooted varieties. It has been tried in a great many sections of the country and has given excellent results where a quick cover was desired and has proven particularly adaptable for sowing on old lawns which have become shoddy and in need of renovating. Lb., 65c; pk., \$3.00; bu., \$11.50; 100 lbs., \$55.00.

KENNEDY'S KWIKTURF

Lawn Grass Seed Mixture

Where a quick turf is desired which will remain green with a minimum of care and attention we recommend this mixture which is composed of deep rooting, strong growing grasses. Lb., 55c; bu., \$9.00; 100 lbs., \$45.00.

KENNEDY'S

PUTTING GREEN MIXTURE

This mixture is made up of deep rooting permanent grasses with a view of forming a close turf which will stand being played on a great deal without showing any wear and tear. Bu., \$20.00; 100 lbs., \$95.00.

KENNEDY'S SHADETURF

Lawn Grass Seed Mixture

This is a mixture of extra fine grasses adapted for growing in the shade and under trees. We recommend the use of this mixture wherever other grasses, on account of shade, have failed to make a close sward. Lb., 85c; 5 lbs., \$4.00; bu., \$15.00; 100 lbs., \$75.00.

KENNEDY'S TENNIS COURT MIXTURE

The hardiest and finest low-growing grasses are contained in this mixture. It produces a beautiful and lasting green turf calculated to withstand hard wear and tear. Bu., \$20.00; 100 lbs., \$95.00.

SOUTHERN Lawn Grass Seed Mixture

A mixture prepared for Southern lawns and contains grasses best adapted for dry, hot sections in the South where many of the grasses will not thrive. We recommend seeding in the spring and fall. 100 lbs., \$60.00.

KENNEDY'S TERRACE MIXTURE

A mixture of strong, deep-rooted grasses for banks and terraces. Although the grasses are strong and deep-rooted, they will produce a fine, green velvety surface, and also prevent washing away during heavy rains. Lb., 85c; 5 lbs., \$4.00; bu., \$15.00; 100 lbs., \$70.00.

LAWN CLOVER—Dwarf White

The only variety suitable for lawns. Very dwarf and of a spreading habit. We advise sowing White Clover separately on account of the seed being much heavier than that of the finer grass seed. It has a tendency to work to the bottom of the receptacle it is being sown from and consequently the last part of the grass seed sown has a greater percentage of clover than the first. Lb., \$1.35.

KENNEDY'S LONG STEMMED IMPERIAL GIANTS

The Pansy has been a garden favorite since the middle of the 17th century. In recent years, hybridizers have developed the size of flower and length of stem to such an extent as to make descriptions inadequate. To convey a true picture of the infinite perfection of form, range of color, texture of petals, and length of stem, produced by our mixture of Long Stemmed Imperial Giants, is impossible.

Six years ago we offered Kennedy's Long Stemmed Imperial Giants in mixture only. With their free flowering habit and wide range of sombrous shades of soft velvet, we do not hesitate to proclaim Kennedy's Long Stemmed Imperial Giants the finest Pansies in cultivation today.

We are now glad to be able to offer this same strain in fixed named varieties, in addition to the mixture. Because the best flowers are shy seeders, the price of a good strain is necessarily high.
